

Perinatal Outreach Program Presents

High Risk Neonatal Nursing Care

Friday October 16th, 2015 8 am-3 pm

Hosted by: Dameron Hospital

Neonatal Sepsis

Speaker: Adrienne McIntyre RNC, MS, CNS

Upon completion of this program the participant will be able to:

- Differentiate between early onset and late onset sepsis
- Discuss risk factors of early onset sepsis and determine the probability of early onset sepsis using the newborn sepsis calculator
- Describe the clinical management for the baby with sepsis

Neonatal Labs

Speaker: Tanya Kamka RNC-NIC, MSN

Upon completion of this program the participant will be able to:

- Understand cell differentiation and its application to the CBC with differential and platelets in the newborn period
- Review the clotting cascade and apply knowledge of its function to interpretation of clotting factor lab results in the newborn period.
- Identify abnormal electrolytes in infants by lab results & clinical symptomatology

Neonatal Abstinence Syndrome

Speaker: Pam Wright MS, PNP

Upon completion of this program the participant will be able to:

- Identify 2 drugs associated with fetotoxic effects when taken in pregnancy
- Identify the physical and neurological problems of the drug exposed baby
- Describe the differences between a "toxicity" and a withdrawal state after delivery of a drug exposed infant
- Recall two medications that are recommended for the treatment of opiate withdrawal in infants
