

UCSF Benioff Children's Hospital Outreach Program Presents:

## High Risk Perinatal Nursing Care

Thursday February 11<sup>th</sup>, 2016

8:15 a.m. to 11:45 a.m.

### Common Postpartum Complications:

#### Pain Management, Urinary Retention, Hematoma and Endometritis

Speaker: Valerie Huwe RNC-OB, MS, CNS

- Examine current methods of pain control for women after childbirth
- Discuss evidence based strategies for postpartum urinary retention that promote optimal outcomes
- Review physiology and management for patients with hematoma and/or endometritis

### Diabetes in Labor and the Immediate Postpartum Period

Speaker: Molly Killion RN, MS, CNS

#### Upon completion of this program the participant will be able to:

- Differentiate between different types of diabetes and their respective risk factors
- Summarize the effects of pregnancy and labor on insulin requirements.
- Discuss intrapartum management for the pregnant woman with pre-gestational and gestational diabetes.
- Identify strategies for the management of women with diabetes in the immediate postpartum period.
