

The UCSF Benioff Children's Hospital Outreach Program Presents:

## Neonatal Skills Workshop

Tuesday December 15, 2015 from 8:30 am -2:30 pm

ALL staff: 08:30-12:00

MDs, RTs, CNMs: 12:30-14:30

**St Joseph's Hospital, Eureka**  
**General Hospital Campus, Burre Room**  
**2200 Harrison Street, Eureka CA 95501**

**Target Audience:**

Anyone who may care for a compromised newborn including RNs, MDs, CNMs, RTs, Pharmacists and Ancillary Staff

**Program Description:**

This session focuses on emergency skills for the sick neonate including:

- Care and Stabilization of the Very Low Birth Weight Baby (VLBW)
- Respiratory Care (PPV, Intubation and Pneumothorax Care)
- Vascular access (IV's, Umbilical Lines, I/O insertion)
- Preparation and Use of Emergency Drugs (Epinephrine, PGE, Dopamine)
- Identification and Care of the Infant with Hypoxic Ischemic Encephalopathy (HIE)

**Upon completion of this program the participant will be able to:**

- Identify the unique needs of the very low birth weight Infant
- Specify the ideal type of vascular access for the sick neonate using case studies
- Describe strategies to optimize team performance and communication
- Practice high risk, low volume skills in a supportive environment

**Elizabeth Rex, RN, MS, NNP, and Cynthia Jensen RN, MS, CNS**
